Comfort Craft Exact Fit Linens

\$33.25

Given the many varieties of Comfort Craft table shapes, some of my customers prefer to have exactly-fitted linens for their tables.

Â

The price quoted above is for my labor to alter the sheets of your choice into a pair of fitted sheets - torso and body. The price does not include the purchase price of the sheets themselves or the shipping costs of the final product. Sheet selection is a very personal issue (cotton, percale, flannel - not to mention colors), and we will deal with that directly between the two of us when you order your sheets.

Â

Typically, when I am doing a custom order for Comfort Craft tables, the most effective way to get quality fabric is to buy high thread count sheet sets from the store. In the past, I have used Younker's Savannah 500 count sheets sets, although their local store has gone the way of JCPenney and Hancock Fabrics (closed). If you have a preference of sheet brand you would like used, than that is what I shall use. I am also willing to research and present you with options. Â

Other options are to add covers for arm extensions, covers for the head rests, and mattress pads.
