Hot Pads - set of 2

\$17.00

I tried for two years to find a decent hot pad - searching every store I had cause to enter. Then, I remembered I could sew!! (sigh)

Â

These hot pads are made from two layers of the thickest towels I can buy, and triple-sewn around the edges with brilliantly beautiful quilting fabrics. Â Because I use no insulation or batting in the center, the hot pads are flexible and wash perfectly - yet they are thick enough to protect me from the burn of cast-iron heated on the wood stove. Â Neither my husband (with his big beefy hands) or I have ever felt the heat penetrate these large, pliable hot pads.

Â

My color selections are constantly changing - each new towel matched with the perfect accent in 100% cotton quilting fabric - each combination produced only 12 times. Â You are welcome to email me for photos of the current inventory, send me samples of the colors you want me to match, or request custom combinations. Â I try to keep at least 30 designs in stock at all times - so I might very well have just the hot pads you desire!

Â

Each order provides you with a pair of hot pads, and the price does include shipping.
